

Yukon Environmental and
Socio-economic Assessment Board

Request for Qualification Form

The Yukon Environmental and Socio-economic Assessment Board (YESAB) is seeking companies interested in becoming part of our source list, which is a compilation of technical experts that can provide technical advisory services. In the event that we require technical assistance, the source list helps us identify suitable technical experts to be part of a request for proposals. In order to become part of our source list, companies must complete this form and may include an attachment with additional information (e.g. supplementary technical information, company profile) which is limited to one single digital document that contains a maximum of 20 pages and is less than 10MB. After receiving a company's information, YESAB will: evaluate the information provided and determine whether the company meets our qualifications; notify the company of the outcome of our evaluation; and add qualified companies to the source list. Successful applicants will remain on the list for two fiscal years.

Submit this form and additional information to yesab@yesab.ca with the subject line "Request for Qualification".
